Animated Game Show (4 mins)
where the biggest greenhouse
gas emitter is crowned
Worst Polluter !

Commissioned by Chipstop, a non-profit group dedicated to protecting wildlife and biodiversity in the forests of South East Australia. While many are planting small seedlings in an attempt to capture carbon, the Eden Woodchip Mill is wiping out tens of thousands of hectares of mature native forest.

GLOBES OF AUSTRALIA

Australia's incandescent light globes are such a serious carbon polluter they're being banned by the Federal Government. They may have a nice golden glow, but these globes use five times more electricity than the new fluorescents. Are Australia's incandescent globes bad enough to be Worst Polluter?

CARS OF SYDNEY

2.3 Million cars burning fossil fuels and pumping out exhaust. Does the smoggy haze made by all of Sydney's cars have enough greenhouse gases to make them Worst Polluter?

EDEN WOODCHIP MILL

Perched on the East Coast, amid the forests of South East NSW and East Gippsland. The Eden Woodchip Mill consumes 2500 trees a day to make woodchips for Japan. After logging a forest there's a burn to 'clean up' the remains. The logging burn is so intense, it incinerates the leftover trees, branches, stumps and roots. It even burns down into the soil. The Eden Woodchip Mill is trashing 15,000 Hectares of carbon rich forest every year. Enough to make it Worst Polluter?

So who will be crowned Worst Polluter?
